Adjusted EBITDA - Represents CVM EBITDA (net income plus depreciation and amortization, financial expenses, financial income, current and deferred taxes), adjusted for the present value adjustment on sales and sales taxes, non-operational contingency provisions, nonrecurring results, extraordinary, and stock option plan.

In the second quarter of 2025, the Technos Group recorded solid growth in revenue and gross profit, achieving the best second quarter and first half of its history in terms of Adjusted EBITDA. This was the 19th consecutive quarter of expansion in this indicator, demonstrating the consistency of the Company's results even in a challenging macroeconomic and geopolitical environment.

In the quarter, Gross Profit was 23.9% higher than the second quarter of 2024. The robust growth in Gross Profit occurred together with the increase of gross margin showing that the company remains committed to defending a healthy margin for our products through rationalization of merchandise costs, selective price pass-throughs and currency hedging policies. In addition, sales growth was driven by a 5.1% increase in the volume of watches sold and a 17.9% increase in the average price.

In the quarter, gross profit was 24.1% higher than in the second quarter of 2024. This robust growth resulted from a significant increase in sales, combined with a 0.7 p.p. increase in gross margin—reflecting the appreciation of higher value-added collections, the rationalization of merchandise costs, and greater efficiency in technical assistance and raw material freight costs. This evolution reinforces the Company's commitment to maintaining a balance between revenue growth and margin preservation.

In the quarter, Selling and Administrative Expenses grew 8.4% versus the same quarter of the previous year. This increase in expenses is mainly the result of higher expenses directly related to sales, such as commercial remuneration, freight, gifts and investment in marketing. As mentioned in previous reports, the Technos Group remains focused on maintaining a lean and efficient expense base.

In the quarter, adjusted EBITDA totalled R\$32.1 million, an increase of 25.5% compared to the second quarter of 2024. The sequence of 19 quarters showing growth in adjusted EBITDA demonstrates the robustness and consistency of the business model implemented by management.

In the second quarter of 2025, despite solid operating performance, Technos Group's net income was R\$ 19.1 million, representing a 4.9% decrease compared to the same period last year. This decline is due to a temporary and largely non-cash effect on the financial result related to the update of the estimated future impact of foreign exchange hedging operations. The Company adopts a consistent hedging policy aimed at mitigating risks arising from currency exposure and cushioning the cash impact of short-term fluctuations in the dollar. However, in highly volatile scenarios, maintaining these contracts can generate temporary effects on the financial result, without a significant impact on cash.

In this quarter, the Company recorded a cash balance of R\$66.6 million and gross debt of R\$97.2 million with an average maturity of 16 months, resulting in net debt of R\$30.6 million. During the period, the Company repurchased shares totaling R\$12.9 million, corresponding to 2.1 million shares. In May, the Company approved the cancellation of 1,500,000 million treasury shares, without reducing its capital stock. After the cancellation of shares, the Company's capital stock is now divided into 61,856,215 common shares.

With regard to 2025, the Technos Group plans to continue with its objective of fostering growth with efficiency, seeking market share gains in the traditional watches category and market expansion in the smartwatches category. The company will also continue to invest in expanding its distribution channels in both wholesale and retail, opening up new horizons for growth beyond its core channel. Revenue growth, coupled with the maintenance of efficiency gains achieved in previous periods, are important elements for future operating gains in the long term.

GROSS REVENUE

In the quarter, gross revenue grew by 23.9% versus the same quarter from last year. The strong sales acceleration is the result of growth in almost all of the company's brands and distribution channels and represents a significant gain in market share in the traditional watch category.

In the quarter, the average price reached R\$235, an increase of 17.9% compared to the same period in 2024. The volume totaled 609.5 thousand, with 5.1% growth versus the same period in 2024.

In the quarter, Net Revenue reached R\$121.9 million, an increase of 22.5% versus the same period in 2024.

Sales taxes grew 24.0% in 2Q25, due to both the increase in sales and the legislative change that, from 2024 onwards, treats donations and subsidies (in the case of Technos, the ICMS tax incentive credit from Zona Franca de Manaus) as a taxable calculation basis for PIS/COFINS.

It is important to highlight that as of the first quarter of 2021, a tax benefit was approved which allowed the company to enjoy an increased use of ICMS tax benefit. This additional benefit, initially approved for 2021, has already been renewed twice and currently runs until December 2026. In 2Q25, we had an impact of R\$5.5 million compared to R\$3.4 million in 1Q24.

GROSS PROFIT AND GROSS MARGIN

In 2Q25, the Company recorded Gross Profit at R\$ 67.9 million with 55.7% Gross Margin, showing growth in Gross Profit of 24.1% and an increase in Gross Margin of 0.7 p.p.

It is important to note that the company remains committed to defending a healthy margin for our products by rationalizing merchandise costs, selective price transfers and currency hedging policies.

SELLING AND ADMINISTRATIVE EXPENSES

In the quarter, selling and administrative expenses amounted to R\$39.5 million, 8.4% increase versus 2Q24. Expenses represented 32.4% of net revenue in the quarter versus 36.6% in the second quarter of 2024.

Selling expenses increased 13.4%, or R\$3.5 million, compared to the same quarter in 2024. This growth was due to expenses with media, higher investment to foster sales, freight, commercial travel, commercial compensation and inflation.

General and administrative expenses decreased R\$0.4 million or 3.7% compared to 2024. Such decrease is a result of lower administrative expenses.

Other operating results, net totaled an expense of R\$5.1 million in the quarter, versus a gain of R\$0.8 million in the same period of the previous year.

In the second quarter of 2024, this account was positively impacted by R\$ 2.6 million due to the reversal of a contingency, whereas in the second quarter of 2025, it was impacted by a provision for other operating expenses.

EBITDA AND ADJUSTED EBITDA

In the second quarter, Adjusted EBITDA went from R\$25.6 million in 2024 to R\$32.1 million in 2025, a growth of 25.5% mainly due to the relevant sales growth. EBITDA margin reached 26.3% in the quarter compared to 25.7% in the second quarter of 2024.

Adjusted EBITDA and EBITDA Margin

NET FINANCIAL RESULT

In the second quarter of 2025, the net financial result was R\$0.0 million versus a positive R\$6.3 million in the same quarter of 2024, mainly due to a higher expense of R\$6.7 million with exchange rate variation and hedging.

It is important to emphasise that the exchange rate impact reported is primarily due to a temporary, non-cash effect on the financial result, resulting from updating the estimated future impact of the exchange rate hedge. We work with a consistent hedging policy, which aims to mitigate the risks arising from foreign exchange exposure and cushion the cash impact of short-term fluctuations in the dollar. On the other hand, maintaining hedge contracts generates temporary effects on the financial result whenever there is high exchange rate volatility. In the quarter, the dollar went from R\$5.74 at the end of March 2025 to R\$5.46 at the end of June, a devaluation of the dollar of close to 5% (versus an appreciation of approximately 10% in the previous year). The impact of this on hedge contracts in effect at the end of June 2025 is the main reason for the change in financial results compared to the same period in 2024. It should be noted that these transactions are strictly protective in nature, are contracted consistently and independently of short-term currency volatility, in line with the company's risk management policy.

NET INCOME

In the quarter, the Company recorded a net income of R\$ 19.1 million, 4.9% lower compared to the second quarter of last year, mainly due to the estimated future adjustments related to hedge contracts entered into by the Company. During this quarter, there was a significant depreciation of the U.S. dollar, which required a substantial non-cash negative adjustment in the financial result, as detailed in previous sections.

WORKING CAPITAL

(-) Accounts Payable	36.7	81	52.7	96
(=) Working Capital	230.3	323	305.7	361

The Company's working capital totaled R\$305.7 million in the second quarter of 2025, representing an increase of R\$75.4 million or 32.7% compared to the same period in the previous year. In days, working capital totaled 361 in the last 12 months ending this quarter, a increase of 38 days compared to the second quarter of 2024.

The Company's balance of Accounts Receivable amounted to R\$ 193.9 million compared to R\$ 154.0 million in the previous year. The average sales term in the last twelve months shows a 4-day increase as compared to the same period of the previous year, mainly due to the sharp increase in sales during the last quarter. The average sales term for the year was 5 days longer than the previous year, and we continue to maintain a stable and healthy default rate compared to the historical performance of the indicator.

Inventory closed the period with a balance of R\$164.5 million, R\$51.5 million higher than in the second quarter of 2024 and at an ideal level from a supply perspective, mainly due to the sales increase in the last quarter.

The Company presented a Supplier balance of R\$52.7 million versus R\$36.7 million in the same period of 2024, mainly due to the acceleration of the purchasing flow to replenish inventory in a stronger sales scenario.

CASH BALANCE

Technos Group ended the second quarter of 2025 with net debt of R\$30.6 million, a decrease of R\$18.3 million in net cash compared to the first quarter of 2025. During the period, share buybacks totaled R\$12.9 million.
